## **TOM CLEMENT APPOINTED TO MIRADOR BIOMEDICAL BOARD OF DIRECTORS**

*Pathway Medical Technologies Co-founder and Board Chairman Joins  
Mirador Biomedical Board*

**Seattle, WA – October 8<sup>th</sup>, 2009** – Mirador Biomedical, Inc., developer of the innovative Compass™ family of medical devices, announced today the appointment of Thomas Clement to its Board of Directors. Clement co-founded Pathway Medical Technologies, Inc. in October 1998 and served as the company CEO until September 2008, when he assumed the role of Chairman of the Board. Under his leadership, Pathway Medical brought to market its flagship product, the Jetstream™ System for treatment of peripheral arteries, and successfully raised more than \$84 million. Previously, Clement was a founding employee of Heart Technology which grew to more than \$100 million in revenue and 550 employees before being acquired by Boston Scientific. Clement has over 25 years experience in product development engineering, engineering management and senior management and holds a Master of Science in Electrical Engineering from the University of Washington. He is currently serving as Chairman of the Board of Directors for the Washington Biotechnology and Biomedical Association (WBBA).

“Tom’s breadth and depth of experience in the medical device industry will be invaluable to Mirador Biomedical as we progress with 510(k) submissions to the FDA, strategic partnerships, and product launch for the Compass family of medical devices,” said Karl Schmidt, CEO of Mirador Biomedical. “We are extremely pleased to have Tom on our Board of Directors and will benefit immensely from his strategic guidance.”

“Mirador Biomedical is developing a unique and widely applicable family of devices that will enhance patient safety, by providing data at the point of use in a simple and intuitive package,” said Tom Clement. “I am excited to join the Mirador Board and actively provide strategic assistance as they navigate their way to market.”

#### **About Mirador Biomedical**

Mirador Biomedical’s team of experienced entrepreneurs and seasoned medical device professionals are partnering with an exceptional group of physicians and scientists to develop innovative, cost effective devices that provide physiological feedback to alleviate doubt and uncertainty during common medical procedures.

Mirador Biomedical is a privately held company founded in 2009 in Seattle, Washington to develop the Compass™ family of medical devices. The lead product, the Compass Vascular Access, is a sterile, inexpensive, single-use device with an incorporated digital display designed to provide quantitative pressure measurements during the insertion of central venous catheters. The device integrates seamlessly with current procedural techniques and enables physicians to simultaneously view their hands, the patient and the pressure without additional cabling, operators or connections.
